Opis produktu

Książka w twardej okładce. Wersja językowa - angielska.

The World Championship match between Fischer and Spassky in Reykjavik 1972 was played at the height of the Cold War. The image of a lone American genius defeating the Soviet machine captivated a worldwide audience unlike anything else in chess history. Exactly fifty years later, **Fischer - Spassky 1972** takes a fresh look at both the chess and the human aspects of this monumental match.

Bobby Fischer is one of the greatest chess players of all time. His astonishing journey up to the 1972 match was documented in [The Road to Reykjavik](#). In this volume, award-winning author **Tibor Karolyi** completes his study of Fischer's career with in-depth analysis of the legendary Reykjavik match and the controversial Fischer - Spassky 1992 rematch.

International Master **Tibor Karolyi** is a renowned author and trainer from Hungary. His biographical works for Quality Chess have received glowing praise from readers and reviewers.

520 pages - Published 31 August 2022

Reviews

"How do you tell a story that has been told many times? Károlyi does not choose to create something new, but opts for a contemplative approach, in which he analyses various sources about the match in addition to the games. He covers key perspectives by covering each side's comments from both the most famous grandmasters of the day and the mainstream media (particularly the New York Times). This gives the reader a real sense of the interest there was in both matches at the time and exposes you to the discrepancy between American and Russian sources...

Still, it would not do the book enough justice to consider it merely a summary of earlier sources. The analyses are strong, accessible and offer surprising insights that had not been noticed before, giving the book its unique character."

IM Herman Grooten ([full review](#) in Dutch)

"50 years on this is the 'Match of the Century Revisited' and unsurprisingly the combination of Karolyi and Quality Chess has done a fine job."
