Opis produktu

**Książka w języku angielskim w miękkiej okładce
432 strony**

Why is it that the human brain so often refuses to consider winning chess tactics? Every chess fan marvels at the wonderful combinations with which famous masters win their games. How do they find those fantastic moves? Do they have special vision? And why do computers outwit us tactically? Forcing Chess Moves proposes a revolutionary method for finding winning moves. Charles Hertan has made an astonishing discovery: the failure to consider key moves is often due to human bias. Your brain tends to disregard many winning moves because they are counter-intuitive or look unnatural. Its a fact of life: computers outdo us humans when it comes to tactical vision and brute force calculation. So why not learn from them? Charles Hertans radically different approach is: use COMPUTER EYES and always look for the most forcing move first. By studying forcing sequences according to Hertans method you will: Develop analytical precision; Improve your tactical vision; Overcome human bias and staleness; Enjoy the calculation of difficult positions; Win more games by recognizing moves that matter. This New and Extended Fourth Edition of Hertans award-winning modern classic includes 50 extra pages with new and instructive combinations. There is a foreword by three-time US chess champion Joel Benjamin, and a special foreword to this new edition by Swedish Grandmaster Pontus Carlsson. Charles Hertan is a FIDE master from Massachusetts with several decades of experience as a chess coach. He is the author of the bestselling Power Chess for Kids series.
