Chess players can look ahead, formulate a clear plan, and act accordingly. That's why chess is the perfect learning environment for becoming a strategic expert. But how do you train this? It starts with playing many games and analysing them carefully afterwards.

At the same time, you should learn from the best by studying the games of the world's strongest players and gradually build their techniques into your play. This book offers you 100 strategic exercises from the games of the best of the best, the World Champions from Bobby Fischer to Ding Liren.

You will learn foundational techniques such as: how to improve your worst-placed piece; how to exploit a lead in development; or make the right piece trade; and how to create a strong square; plus numerous others.

Solving these exercises will help every ambitious club player better understand how to make and execute plans.
