Producent	Wydawnictwo Quality Chess

Opis produktu

Wersja językowa angielska.
Miękka okładka.
424 strony.

Endgame Labyrinths presents the reader with 1002 challenging studies selected and truncated, with their usefulness for the practical player in mind. It is common for studies to be extended by less interesting manoeuvres or by incomprehensible sequences, before the main themes come into play. The studies in this book have been pruned to leave the reader with 1002 clear and solvable challenges.

A few years of extensive selection, analysis, reselection, reanalysis and refining have gone into putting together the study book for the practical player with the most value ever.

Steffen Nielsen is the reigning World Champion in endgame composition. His creativity and aesthetics in his compositions have had a massive influence on modern competition. He is a strong club player, with a good understanding of the difficulties practical players face over the board. Steffen is also a life-long supporter of the football club AaB, which is less successful...

GM Jacob Aagaard is one of the leading chess writers and trainers of his generation. His students have played successfully at all levels and continue to do so. His books are used all over the world, by top players and amateurs alike.

Reviews

Stefan Liebig (Schach-Magazin 64)

"Endgame Labyrinths is a valuable tool for anyone who wants to take their endgame knowledge to a new level. Structured clearly with concise solutions. The book is a top-notch product for improving practical endgame skills."
